

Maedot Alemu

Software Engineer

✉ alemu.maedot@gmail.com ☎ +251911660356 📍 Addis Ababa, Ethiopia 🔗 [LinkedIn](#) 🐙 [GitHub](#) 🏆 [Leetcode](#)

EDUCATION

B.Sc. in Software Engineering , <i>Addis Ababa Science and Technology</i>	05/2022 – 07/2026
Relevant Coursework: Internet Programming, Database Systems, OOP(Java), Operating Systems, Mobile Computing, Computer Graphics, Embedded Systems, Distributed Systems, AI and ML.	Addis Ababa, Ethiopia
Competitive programming and Coding Academy , <i>Africa to Silicon Valley</i>	01/2025 – 11/2025
• Relevant Coursework: Advanced Data Structures and Algorithms (Graph and Tree Algorithms, Dynamic Programming, Advanced String	Addis Ababa, Ethiopia

PROFESSIONAL EXPERIENCE

Eskalate ✉, <i>Full Stack Developer Product Manager</i>	05/2024 – 09/2025
• Built an application acceptance platform with automated review workflows, streamlined submissions, and API-based data access.	Addis Ababa, Ethiopia
• Developed key application features using modern architecture practices, improving platform reliability, test coverage, and performance by 60%.	
• Directed a 15-member team as Scrum Master, consistently achieving a 95% sprint on-time delivery rate for product features.	
ETM Software plc ✉, <i>Frontend Developer</i>	06/2024 – 11/2024
• Collaborated with 10+ developers on <i>Keyu Gasha</i> , an insurance management system serving 500+ clients .	Addis Ababa, Ethiopia
• Integrated Redux Toolkit and NextAuth , streamlining data flow across 10+ components.	
• Optimised UI for cross-device accessibility and responsiveness , increasing customer usability.	
A+ Math and CS fellowship ✉, <i>Mentor</i>	07/2023 – 09/2025
• Delivered 100+ hours of math and coding mentorship to 15+ students , resulting in a significant boost in their problem-solving skills.	Addis Ababa, Ethiopia
• Designed and implemented personalized learning plans that boosted mentee college admission success rates.	
Cheche ✉, <i>Full Stack Developer</i>	05/2025 – Present
• Developed Tickflows , an essential internal workflow and progress tracking tool, by building an application acceptance platform with API-driven data access and custom review workflows.	Addis Ababa, Ethiopia
• Refactored key components of Tickflows ✉ using architecture, contributing to a 60% boost in platform performance.	
• Maintained a consistent 95% on-time delivery rate.	

PROJECTS

Smart Farming System	06/2024 – 05/2025
• Built a distributed IoT platform that automates greenhouse operations by collecting data from 12+ sensors.	
• Designed actuator logic that automatically adjusts irrigation and shading, maintaining optimal soil moisture and light balance with 95% consistency .	
• Integrated weather forecast into the dashboard to support predictive planning and remote farm management.	
• Architected a modular API layer following clean architecture principles , enabling scalable deployment from 6 pilot zones to larger farms without major system reconfiguration.	
NavAR , <i>Unity, AR Foundation, Node.js, Express, PostgreSQL</i>	06/2025 – Present
• Architected a real-time, cross-platform AR wayfinding system with hybrid QR/Wi-Fi positioning, achieving ~3m accuracy.	
• Engineered accessibility features like multilingual audio and high-contrast mode.	
• Built an analytics dashboard with movement heatmaps, helping facilities cut navigation time by ~40%.	
DineQ , <i>Go, Gin, MongoDB, Clean Architecture, JWT, NextJs, NextAuth, OCR</i>	05/2025 – 10/2025
• Led end-to-end system design and development for PWA and mobile clients, building scalable solutions supporting 6,000+ restaurants.	
• Built an Amharic/English OCR-based digitization pipeline to eliminate menu language barriers.	
• Reduced operational costs with on-demand QR menus and real-time updates.	
• Coordinated a 13-member cross-functional team and ensured secure, role-based access.	
Cam-Link , <i>Django, React, MongoDB, Clean Architecture, JWT, Caching, Concurrency</i>	06/2024 – 12/2024
• Engineered a LAN-based streaming platform enabling real-time multi-camera feeds and media sharing in classrooms lacking projectors or internet access.	
• Led a 10-member team to design and deploy a collaborative system supporting 10+ simultaneous camera inputs .	
• Developed the React frontend with modular, high-performance components for scalable streaming.	
• Achieved 1st place for addressing critical classroom infrastructure gaps and improving learning accessibility.	

LEADERSHIP AND ACHIEVEMENTS

- GDSC Hackathon Winner** - Directed a 10-member team in developing a real-time streaming platform.
- Dean Award** - Earned **top academic distinction** for consistent excellence in coursework and overall performance.
- She Codes** - Mentored **30+ students** in web development, strengthening hands-on coding.
- Google Developer Group** - Organized contests and created problem sets, significantly improving students' ability to solve problems.

SKILLS

- | | | | |
|--|---|--|--|
| • DevOps & Design Tools:
Git, GitHub, VS Code,
Figma, Arduino IDE,
Jira, Docker, RabbitMQ | • Database: MongoDB,
MySQL, PostgreSQL | • Frameworks : React,
Next.js, Node.js,
Express.js | • Languages: Python
(NumPy, Pandas, scikit-
learn), JavaScript,
TypeScript, C++, Java |
|--|---|--|--|
